

In the finest tradition

If you thought the time has long since passed when it was possible to own a classic British sports car and enjoy the exhilaration of wind-in-the-hair motoring then take close look at the Haldane.

Unashamedly employing classic '50s styling, the Haldane captures the spirit of an era when British sports cars enjoyed worldwide recognition as the finest in their class.

However, styling is only part of the Haldane appeal.

Beneath the flowing lines of the composite monocoque bodyshell, lies a modern 2 litre D.O.H.C. with fuel injection, management system, and catalytic converter, which together with a robust backbone chassis, and Geoscan designed suspension, bestow the car with the smooth power and taut predictable handling which are the hallmarks of all true sports cars.

Test drive a Haldane; look down the long bonnet, feel the surge of power and the precise handling and, as you relax and feel at ease with the car, you will quickly realise that here at last, within your reach, are the pleasures, thrills and individuality, gained only from owning a classic thoroughbred.
