

## EUROPA ENGINEERING 47R/62S

Europa Engineering, Dept KCI, Banks Service Station, 40, Church Road, Banks, Southport, Lancs PR9 8ET. Tel. 0704 27059.

The Europa Engineering 47R and 62S are replicas of the racing developments of the Lotus Europa. Although a landmark car and the first mid engine Lotus road car, the Europa wasn't a resounding sales success but the 47 racing derivative was. The 62, of which only two were made was a testbed for the Vauxhall based LV220 engine. The Europa Engineering cars are very close physical replicas although suspension design and engine options are bang up to date. The preferred engine is the Vauxhall Astra 8 or 16 valve units breathing through twin Weber sidedraught carburetors. Combining the performance and handling pedigree of the racing Lotuses with the interior opulence of the road going cars, the Europa Engineering copies are worthy additions to the ranks of top flight replica cars.

BACK ISSUE REF.  
SEPTEMBER 1993

Kit prices. Body chassis kit. From £3000 + vat.

## HALDANE 100

Haldane Motor Corporation, Dept KCI, Unit 12, Mackley Estate, Small Dole, Nr Henfield, Sussex BN5 9XJ. Tel. 0273 493860.

The Haldane 100 is a replica of the Austin Healey 100 that was the sensation of the 1952 London motor show. An authentic physical replica down to the last detail, under the skin it is a thoroughly modern miss. A square tube backbone spaceframe chassis, double wishbone suspension all round, four wheel disc brakes and engine options up to the fully catalysed, Ford 2 litre DOHC 16 valve unit. Indeed, in this specification, the Haldane complies with the UK Low Volume Type Approval regulations but it is also available in kit form for home assembly. The company can offer various kit packages containing as much or as little as required.

Kit prices. Chassis and suspension. £1850 inc vat.  
Body. £1950 inc vat.

## HALDANE 300

Haldane Motor Corporation, Dept KCI, Unit 12, Mackley Estate, Small Dole, Nr Henfield, Sussex BN5 9XJ. Tel. 0273 493860.

The Haldane 300 shares its mechanical base with the 100 model but its body reflects the lines of the Austin Healey 3000 announced in July 1959. Cosmetic differences of an oval radiator grille and bonnet bulge were less than radical although the car does have a more aggressive, purposeful look, especially when fitted with the necessary parts to reflect the 'Big Healey' works rally cars.

Haldane can supply all parts for customers wishing to build any model including works rally side vents, optional dashboards and much more. The Haldane is a high quality kit reflecting its optional turnkey status and its compliance with the LVTA regulations.

Kit prices. Chassis and suspension. £1850 inc vat.  
Body. £1950 inc vat.

## KOUGAR MONZA

Kougar Cars, Dept KCI, 2 Emscote Road, Warwick, Warks CV34 4PP. Tel. 0926 492688.

The Kougar Monza has had an undeservedly low key career which is a shame as it is a gloriously attractive and emotive copy of the Ferrari Monzas of the mid fifties. Originally appearing in 1980, it was based on Ford Cortina components and powered by a V6 engine. However, after a long gestation period, the car has now been redesigned and equipped with the necessary underpinnings to truly live up to its looks. A square tube spaceframe chassis accepts suspension components from the Jaguar XJ6 as well as the equally distinguished straight six DOHC engine in a choice of capacities up to 4.2 litres. carrying on the tradition of quality and excellence established by the Kougar Sports, the Monza is a delight both to look at and to drive.

Kit prices. Body chassis kit. £ 6750 + vat
