

## **Haldane HD 100 owned by John Prince.**

Hi Peter

Photographs attached. The car was supplied to Tony Korycki in June 1990 and it came with two chassis numbers on the receipts I have got 900317 and 900318.

Not that any of those chassis numbers have been used because they are not long enough as British chassis numbers have to have 17 digits which I have got from the DVLA.

I purchased the car roughly 14 years ago. All the paperwork has been stamped up by the DVLA back in 2006 and it has just left me now ready to finish the car and take it for a IVA test and then apply for a registration number from them.

The photos I have sent you are photos that were taken a long time ago. The car is now in one piece with 95% of the wiring done, clocks fitted but there is still quite a lot of work to do to finish it off to the standard I am looking for when I find the time as two years ago I started building an MGF so I have got two projects on the go at the moment.

Hope you find it interesting. I think my car was one of the first cars and there was talk it went to one of the car shows.

Regards John
