All interior and external period features, including period number plate.
Fitted Ford 2000cc Twin Cam DOHC, running bike carburetors and high flow exhaust.
Engine control via Omex ECU, current power output aprox 130 bhp, but more rolling road work probably easily increase this. 5 speed box and Sierra running gear.
Much extensive recent work and full rewire including "car builder solutions" module.
A nice recreation of Healey 3000 with no rust problems.
MOT May 2015, Tax Aug 2014, 15,000 miles since original build in 2000.
